KuandoBOX Unified Presence – for the hybrid environments

The KuandoBOX connects to the phone and computer to update user's status to 'Busy' in Skype4B / Lync when talking on the desk phone, thus unifying their presence.

The **Presence** concept is a powerful, fast growing collaboration tool being adopted by thousands of companies moving to unified communications – and when used correctly it yields big benefits.

If presence is 100% reliable. People will use it.

If not – they won't.

Unified Presence:

Step 1: download the software

Step 2: connect kuandoBOX to the phone/Headset & PC

Step 3: Desk Phone status is unified with Skype4B/Lync

Software is the same for #15306 Busylight Alpha & #15410 Busylight Omega
