

**NEW BLUETOOTH® OPERATIONS CRITICAL WIRELESS RSM
FOR MOTOTRBO PORTABLE RADIOS**

NEW BLUETOOTH® OPERATIONS CRITICAL WIRELESS RSM FOR MOTOTRBO PORTABLE RADIOS

With this new wireless Remote Speaker Microphone (RSM), you can focus on the task at hand: put down your portable radio whenever you need to and still move about freely while maintaining communication with your team. Without the constraints of the RSM cord in the way, you can perform your daily tasks safely. By simply pairing the wireless RSM to your radio via voice prompts, the process is easy and effortless leaving you to focus quickly on your daily duties.

DP4000/DP4000e Series: DP4401, DP4401e, DP4601, DP4601e, DP4801, DP4801e

DP3000e Series: DP3441, DP3441e, DP3661e

SL4000 Series: SL4000, SL4000e, SL4010, SL4010e

ORDERING INFORMATION:

- GMLN5503 Operations Critical Wireless RSM with battery, clip and dual desktop charger (EURO plug)
- GMLN5504 Operations Critical Wireless RSM with battery, clip and dual desktop charger (UK plug)
- MDRLN6561 Operations Critical Wireless RSM with battery and clip
- PMLN6716 Wireless RSM Vehicular Charger

Note: the new Operations Critical Wireless RSM is compatible with the listed portable radio families. This new solution does not replace the existing long range Wireless Mobile solution which still provides user groups on the go the benefit of long range enhanced remote operations when working outside of their vehicle (up to 100 metres range). The operations critical wireless portable RSM does not include a blue dot on its front housing (unlike the long range wireless mobile RSM which uses the secure touch pairing feature to pair with the Bluetooth gateway).
