MOTOROLA ANALOGATEX END OF LIFE

Further to the successful launch of the digital DP4000 Ex Series ATEX radios, Motorola has issued a Cancel Notification for the ATEX radio predecessors; the analogue GP Ex Series. The following radio cancellation later this year, with a last order date of 18th October 2013 (delayed from an initial date of 1st October 2013).

- ▶ GP340 Ex ATEX Portable Radio
- ▶ GP380 Ex ATEX Portable Radio
- ▶ GP680 Ex ATEX Portable Radio (excluding standard trunked models)

ALARMS ARE CRITICAL IN EXPLOSIVE ENVIRONMENTS

The **ZONITH Alarm Control System** is a software application that links technical alarms to ATEX digital radios. By installing ZONITH software you can link SCADA, process control and safety monitoring systems directly to MOTOTRBO ATEX radios.

Here are some examples of where you can integrate and utilise your ATEX radios to monitor Alarms:

- ▶ Digital Control System alarm messages as text
- ▶ Plant engineers can receive process control alarm and lone worker messages
- ▶ Staff can monitor platforms being notified of emergency and lone worker alarms
- ▶ Technicians can monitor telemetry, smoke detector and overflow alarms
- ▶ Engineers monitor environmental, toxicity and pressure alarms
- ▶ All staff are instantly notified of evacuation or fire alarms on ATEX radios
