

DN400 4G LTE Wi-Fi PoC Radio SIM Fitting Instructions

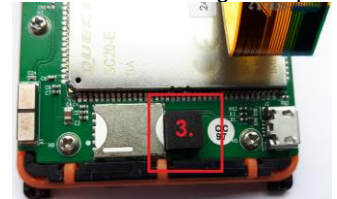

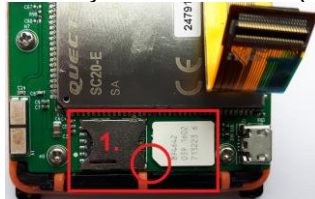

1. Unscrew the antenna (1) and carefully pull off the top knobs (2)
2. On the back of the radio, remove the 2 retaining screws

3. Carefully insert flat screwdriver to open the radio
4. Carefully un-plug the connecting flexi PCB cable

5. Correctly orientate the SIM (1)
6. Insert the SIM (2)
7. Fit the SIM retaining foam pad (3)

8. Reconnect the flexi PCB to the front board
9. Being careful not to pinch the sealing gasket, re-fit the rear cover carefully pushing in at the bottom to close the radio
10. Replace the rear cover screws back
11. Replace the antenna and top knobs
