

DN595 APN Setup.

Goto settings/wifi and make sure wifi is enabled.

Then select WIFI/ADVANCED SETUP. You will see this screen. The DN radio is now a wifi 'hotspot' with an SSID in the format DN-DPCAxxxx corresponding to the serial number of the radio. (do not press any other buttons on the DN radio at this stage)

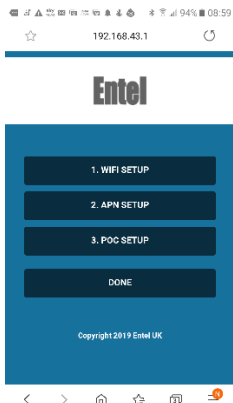

Now, Using your smartphone – goto wifi network selection....

And connect to the DN495 wifi hotspot. (there is no password)

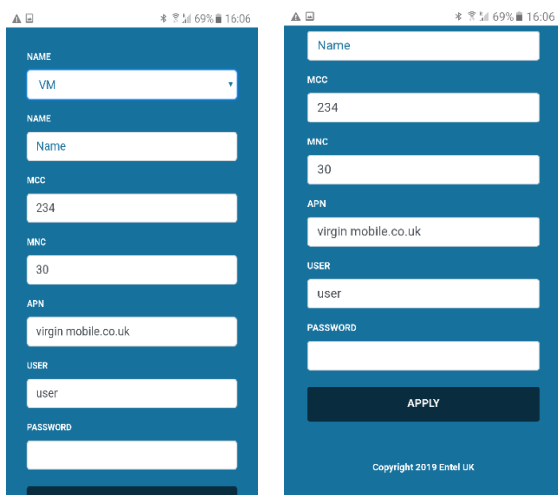

When connected, your web browser will launch with this screen if using an IOS device, or with Android, manually open your web browser and type '192.168.43.1' into the address bar and 'enter'. (or go to this address

The browser will show the configuration menu shown below.

Now click APN setup.

Please enter the APN details from your provider as per the following example....

Click 'Apply' . (this will return you to the previous menu)

Finally, Click 'DONE' at the bottom of the menu.

The DN 495 will restart and connect with the credentials just entered.
