

Setting the Time Zone and Country

When starting with the factory default settings (Example: First time to access, or after an initialization), you must configure the Time Zone and Country code*.

*Required only in Europe.

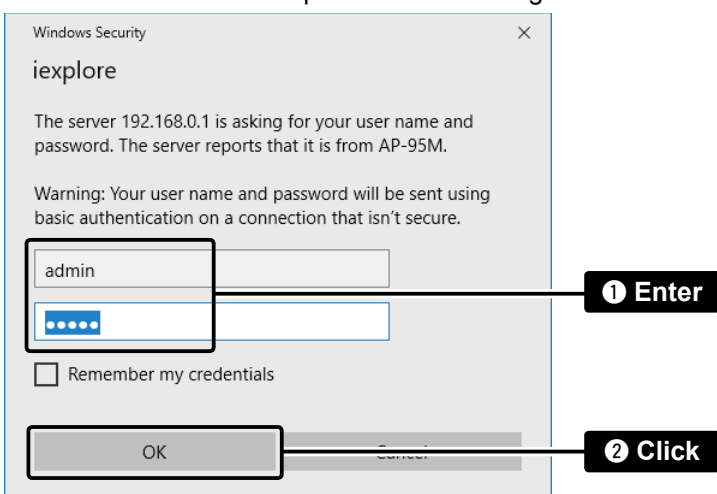

NOTE: To reset settings, click <Reset> before clicking <Apply>.

- 1 Open your web browser, then enter "http://192.168.0.1/" into the address bar.

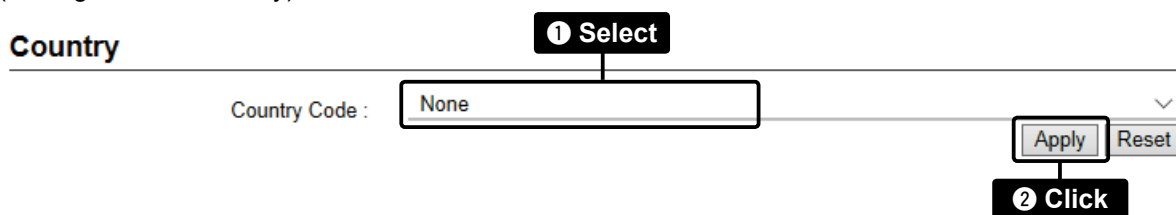

- 2 Push the [ENTER] key.
 - The Login Authentication screen is displayed.

- 3 Enter "admin" into both input fields on the Login Authentication screen, and then click <OK>.

- 4 **Only in Europe:** Select the appropriate Country code of use, and then click <Apply>.
(Management > Country)

- 5 Select the appropriate Time Zone, and then click <Apply>.
(Management > Date and Time)
