### ◆ Installation

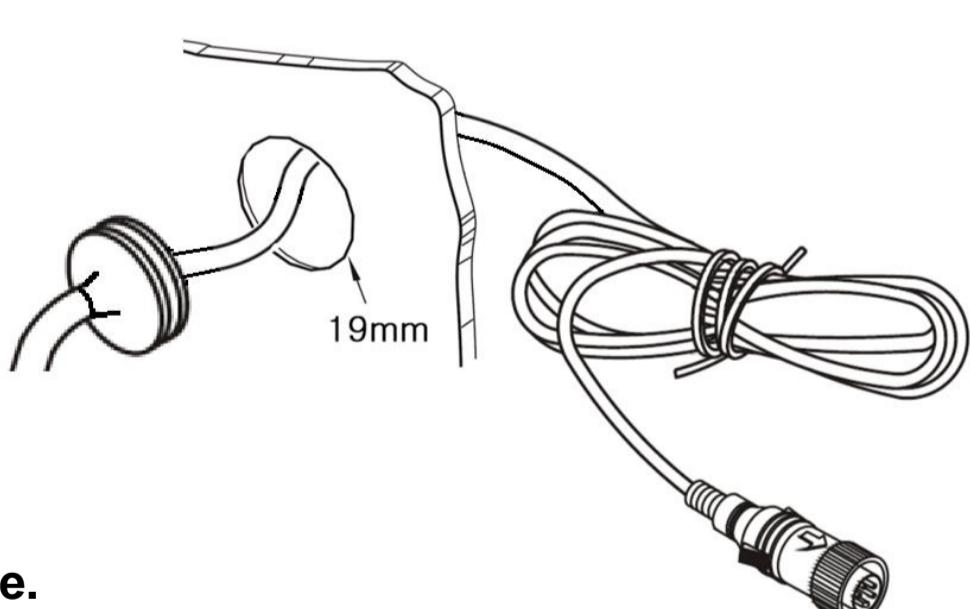

#### ▪ Camera Assembly

1. Fix the supplied camera bracket to the vehicle.
2. Fix the bracket with camera according to drawing.
3. Adjust the viewing angle of the camera and fasten the screws firmly.

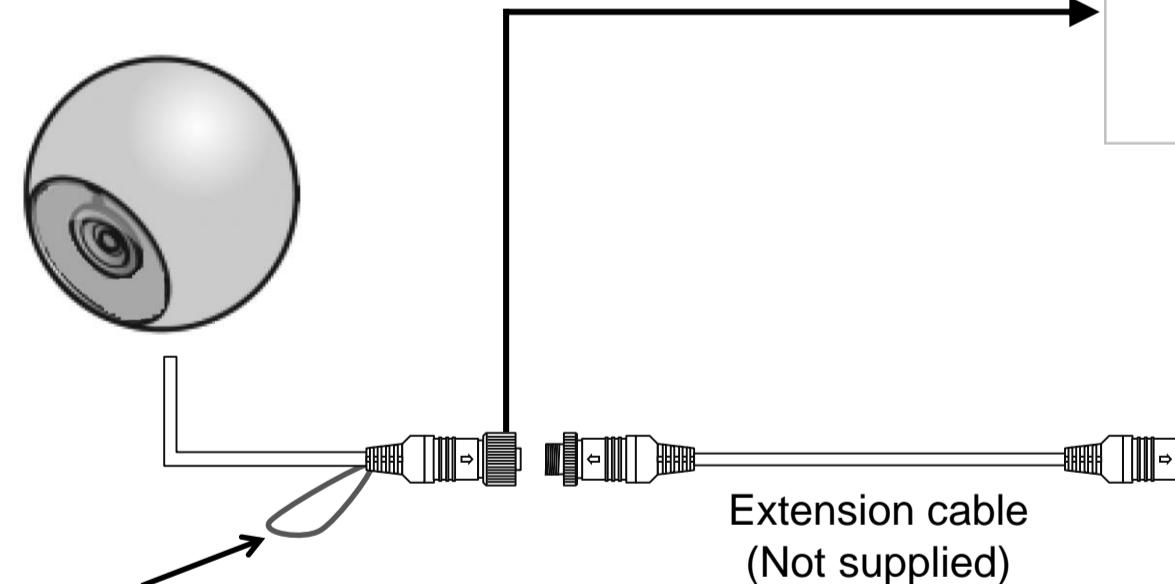

#### ▪ Cable grommet

Drill a suitable hole (approx. Ø 19mm) and insert the cable grommet. Just before final fixation, please apply a proper sealant (for prevention) between the hole and the grommet and also between the cable and the grommet.

#### ▪ Wiring to Monitor

Run the cable from the camera to the monitor.

#### Camera pin configuration

#### ▪ Normal / Mirror image

Mirror / Normal image can be changed via the Green cable as below

- \* Blue cable loop un-cut : MIRROR IMAGE
- \* Blue cable loop cut : NORMAL IMAGE

#### ▪ Securing cable connection

1. Match the arrow marks and press the connectors together.
2. Screw the camera connector up clockwise.

3. Tighten cable connection firmly in order to prevent water ingress.

#### Note!

The warranty will not be valid if the problem is related to moist / corrosion in the connector.

#### ▪ Caution !!

1. Before making the connection, disconnect the ground terminal from the battery to avoid short circuits.
2. The plugs should be fully inserted into the connectors or jacks. A loose connection may cause malfunctioning of the unit.
3. A damaged cable may affect the operation of the camera and may even cause a malfunction of the camera or monitor: Avoid a damaged cable!
4. Protect the cable by using a guide tube, pipe or run the cable inside the vehicle as much as possible. Caution! Run the cable in natural shapes in order to prevent cable breaks.
5. Preferably use an acid free grease in between the waterproof screw type connectors and tighten them firmly each other.
